

Website Statement of Work ADA compliancy

Dear Elaine,

It was a pleasure to speak with you regarding your website accessibility assessment. Below outlines what will be done for me to make your website ADA complaint by law.

Scope:

The service offers the following features:

- **Accessibility technology and subscription cost:** The client will purchase the [Accessibe](#) plugin through a customer portal provided by Kenric. The purchase from Accessibe is a subscription service and will be renewed between Accessibe and the client annually. The customer can take advantage of all features of the Accessibe plugin at the appropriately purchased tier.
- **Onetime installation fee and first year maintenance:** Once the service is purchased by the customer, Kenric will install in on the client's website (<https://edsintegrative.com>).
 - Kenric will verify that the plugin works properly on the client's website.
 - Kenric will also run monthly accessibility scans of the client's website and provide reports for the first year.
 - Kenric will work with the vendor (Accessibe) to ensure proper installation and rectify any technical issues.
 - After the first year the client will be responsible for running accessibility reports at their leisure. Kenric can train the user on how to run the reports at no additional cost during the first year.

Delivery Timeline:

This timeline is based on receiving payment from the client for Accessibe and the onetime installation fee.

Renewal of Agreement/Maintenance:

Any time prior to the end of the first year the client can discuss renewal terms and payment with developer for the upcoming year. This is completely optional since the client has open access to their own portal for the product. If any additional changes are needed to the product the user can get a prorated cost from Kenric or deal with the product tech support directly for no additional cost.

Sincerely,

Kenric Barclay,

CEO of Kubitt.com
